“Elegance from Handmade motorcycles and only one word : Avinton”

In a world often reduced by mediocrity, the concept of original product often gets absorbed by the world of consumption. As a manufacturer we're unique in that we prefer our customers design specifications over what the bankers believe would best suit an Avinton.

This is why having an Avinton motorcycle is so special and causes us to stand out from the rest. Having an Avinton is to love the perfect balance between fine lines, an elegant French touch and the roar of our custom S&S motor, inspired by the Cafe Racer's era, mixed with the curves of the emblematic AC Cobra by Carroll Shelby.

Avinton is more than just a simple motorcycle, it is an extension of oneself. Whether it is the showpiece of your garage or the Sunday luxury ride, our motorcycles will excite all of your sensations.

With a 1/4 of an American V8, displacement of 1647cc and a torque of 170 Nm at 3000 RPM... this bike weighs in at a stunning 385 lb. (dry). Avinton motorcycles are unique and will offer you an exceptional experience. On board, you feel at home. Our bike may intimidate you... and you'll respect it. You are one with your machine.

Each Avinton motorcycle is produced by unit for each of its owners according to their tastes, riding positions, breaking and suspensions systems preferences...

All parts used in the manufacturing of a Avinton are carefully analyzed. All aluminum parts are machined and forged, the bodywork and the fender are made from carbon fiber for fortitude and lightness of weight.

“The Collector range by Avinton Motorcycles”

It is important that you match your Avinton perfectly. First choose your riding position... Race, GT, Roadster

Collector *GT*

The GT perfectly embodies the spirit of the «cafe racer» from the first prototype from Avinton. Riding this bike, will bring back those nostalgic feelings of friendly challenges from the mythic evenings of Brighton's Ace Cafe and the soundtrack of the Rolling Stones. The GT offers an intermediate handlebar height being situated 5cm higher than that of the Race and 5cm lower than that of the Roadster. The GT's riding position is the perfect compromise of becoming one with machine while enjoying a good amount of comfort.

Collector *Race*

The muscle-bike spirit in all its splendor and excess. Decidedly oriented towards performance. The Race differs from the GT by an even sportier riding position. The handlebars are lower, under the fork's triple clamps. This offer's the rider the thrill of becoming one with the bike. With the weight distribution slightly heavier on the front wheel, the Race offers an exceptional control of trajectory and guarantees explosive turns. An incredible geometrically unique riding experience.

Collector *Roadster*

Our most comfortable Avinton to ride. The large handlebars and the fork's triple clamps are specifically adapted to its improved steering angle. The Roadster is geared for daily use and the most suitable for urban traffic. All things considered, there remains an authentic Muscle-bike strength in character coupled with dynamic agility and comfort.
